## About Our Rates

Clean Power Alliance's 2019 non-residential rates are established to meet standard bill comparison targets approved by our Board of Directors (1-2% cost savings for Lean Power, 0-1% savings for Clean Power, and 7-9% cost premium for 100% Green Power). These overall bill savings or premium—depending on which rate option the customer chooses—are in comparison to Southern California Edison's current base rates. Southern California Edison (SCE) has proposed a double digit increase to 2019 rates charged to both their own and Clean Power Alliance customers to make up for a budget shortfall of almost \$1 billion dollars they experienced in 2018. If SCE's proposed increases are approved by the California Public Utilities Commission, they will likely go into effect in March or April 2019. If this happens, all customers will see a rate increase and we will adjust our own rates as needed to ensure our Board-approved savings/premiums do not change. Any future changes to Clean Power Alliance rates will be adopted at public meetings of our Board of Directors.

The rates shown in this document are applicable to non-residential customers in Unincorporated Los Angeles County, Rolling Hills Estates, and South Pasadena only. Rates for non-residential customers in all other Clean Power Alliance member jurisdictions will be adopted in early 2019. These rates reflect charges for electric generation/supply. Please visit [SCE.com](http://SCE.com) for delivery rates and schedules.
