2020 PROSPECTIVE CLEAN POWER ALLIANCE PRODUCT CONTENT LABEL¹

100% Green Power matches 100% of your electricity usage.

The State of California mandates that all utilities meet their Renewable Portfolio Standard (RPS) annual requirement in the goal of increasing statewide renewables. 33% of CPA's 100% Green Power product fulfills this year's CA RPS requirement, with the remaining 67% being voluntarily procured by CPA to advance our clean energy goals. 100% of the product's renewable electricity content is also Green-e® Energy certified.

In 2020, 100% Green Power will be made up of the following new renewable resources averaged annually.

Green-e Energy® Certified New² Renewables in 100% Green Power

Resource Type	Voluntary Renewables	Voluntary Generation Location	Green-e® Energy Eligible State Mandated Renewables	Green-e® Energy Eligible State Mandated Resource Location
Solar	67%	CA	33%	CA
Total Green-e® Energy Certified New Renewables				100%

1. These figures reflect the renewables that we have contracted to provide in 2020. Actual figures may vary according to resource availability. We will annually report to you before August 1 of next year in the form of a Historical Product Content Label the actual resource mix of the electricity you purchased.

2. New Renewables come from generation facilities that first began commercial operation within the past 15 years.

For comparison, the current average mix of resources supplying Southern California Edison (SCE) includes: Renewable (32%), Nuclear (6%), Natural Gas (20%), Hydroelectric (8%), and Unspecified sources of power (34%). This resource mix was prepared in accordance with the California Energy Commission Power Source Disclosure program.

The average home in California uses 546 kWh per month. Source: U.S. EIA, 2018
