Clean Power Alliance has been the electricity provider for the City of Malibu and 31 other communities in Southern California since 2019. Clean Power Alliance purchases clean, renewable energy on behalf of its customers, reducing air pollution and greenhouse gas emissions while creating jobs by funding the development of new clean energy options.

What changed? The Malibu City Council voted in 2019 to adopt the Clean Power Alliance's 100% Green Power as the default rate for Malibu starting October 2020 to reduce the impacts of climate change and air pollution. You can change your rate at any time by visiting cleanpoweralliance.org/rates or calling 888-585-3788.

What does it cost? **100% Green Power costs 7-9% more than SCE's default rate.** Residential customers enrolled in CARE, FERA or Medical Baseline do NOT pay this premium. If you are not already enrolled, check your eligibility and apply through SCE by calling 800-798-5723 or visiting sce.com/care.

Want a different rate? No problem! You can change your rate at any time, at no cost, by selecting: Lean Power (36% renewable energy) or Clean Power (50% renewable energy). Compare your Clean Power Alliance and SCE rate options at cleanpoweralliance.org/compare.

For terms and conditions regarding your Clean Power Alliance service, please visit cleanpoweralliance.org/terms-and-conditions.
