**IMPORTANT NOTICE FROM YOUR
CLEAN ENERGY PROVIDER.**

cleanpoweralliance.org/ourgreencities

Los Angeles County is going to 100% Green Power!

Starting in October 2022, unincorporated LA County will begin a transition to 100% clean and renewable energy from sources like the sun and wind to power homes.*

This will reduce **1.6** billion pounds of greenhouse gas emissions annually, which is like planting **11.7** million trees or taking **152,568** cars off the road.

Thank you, LA County!

* This change in 2022 only applies to residential customers on standard rates. Commercial customers will transition to 100% Green Power in fall 2023. Residential customers on CARE/FERA/Medical Baseline rates will transition to 100% Green Power in 2024.

What does this mean for you and your electricity bill?

Using more renewable energy helps reduce the impacts of climate change. Because clean energy costs a little bit more, a typical bill for residents will go up by approximately **3%**, or about **\$3 for every \$100 of electricity charges**. Only residential customers on standards rates will see this change in 2022. You could offset this cost by turning up your thermostat a couple of degrees in the summer. Follow Clean Power Alliance to learn more energy saving tips.

Do you have a choice? Yes!

If you want to keep your bill what it currently is or learn more about other rate options, visit **cleanpoweralliance.org/compare** or call us at **888-585-3788** or email us at **customerservice@cleanpoweralliance.org**.

Clean Power Alliance supports access to clean energy for all and offers many customer assistance programs. Visit **cleanpoweralliance.org/CPAbillhelp** to learn more and see if you qualify.
