## 2022 HISTORICAL CLEAN POWER ALLIANCE PRODUCT CONTENT LABEL<sup>1</sup>

Clean Power Alliance's (CPA) 100% Green Power product covers 100% of your electricity usage.

The State of California mandates that all utilities meet their Renewable Portfolio Standard (RPS) annual requirement in the goal of increasing statewide renewables. 38.5% of CPA's 100% Green Power product fulfills this year's CA RPS requirement, with the remaining 61.5% being voluntarily procured by CPA to advance our clean energy goals. 100% percent of the product's renewable content is Green-e® Energy certified for those Commercial and Industrial customers who have opted into the program.

In 2022, 100% Green Power will be made up of the following new renewable resources averaged annually.

Green-e Energy® Certified New <sup>2</sup> Renewables in 100% Green Power				
Resource Type	Voluntary Renewables (Green-e®)	Voluntary Generation Location	Green-e® Energy Eligible State Mandated Renewables (CA RPS)	Green-e® Energy Eligible State Mandated Resource Location
Solar	61.5%	CA	38.5%	CA
Total Green-e® Energy Certified New Renewables				100%

- 1. These figures reflect the renewables that were delivered to the 100% Green Power customers in 2022.
- 2. New Renewables come from generation facilities that first began commercial operation within the past 15 years.

For comparison, the current average mix of resources supplying Southern California Edison (SCE) includes: Renewable (31.4%), Nuclear (9.2%), Natural Gas (22.3%), Hydroelectric (2.3%), Other (0.2%) and Unspecified sources of power (34.6%). This resource mix was prepared in accordance with the California Energy Commission Power Source Disclosure program.

The average home in California uses 542 kWh per month. Source: U.S. EIA, 2021
