2023 PROSPECTIVE CLEAN POWER ALLIANCE PRODUCT CONTENT LABEL[1]

Clean Power Alliance's (CPA) 100% Green Power product covers 100% of your electricity usage.

The State of California mandates that all utilities meet their Renewable Portfolio Standard (RPS) annual requirement in the goal of increasing statewide renewables. 41.3% of CPA's 100% Green Power product fulfills this year's CA RPS requirement, with the remaining 58.7% being voluntarily procured by CPA to advance our clean energy goals. 100% percent of the product's renewable content is Green-e® Energy certified for those Commercial and Industrial customers who have opted into the program.

In 2023, 100% Green Power will be made up of the following new renewable resources averaged annually.

Green-e Energy® Certified New[2] Renewables in 100% Green Power

Resource Type	Voluntary Renewables (Green-e®)	Voluntary Generation Location	Green-e® Energy Eligible State Mandated Renewables (CA RPS)	Green-e® Energy Eligible State Mandated Resource Location
Wind or Solar	58.7%	CA or AZ	41.3%	CA or AZ

Total Green-e® Energy Certified New Renewables	100%

1. These figures reflect the renewables that we have contracted to provide in 2023. Actual figures may vary according to resource availability. We will annually report to you before August 1 of next year in the form of a Historical Product Content Label the actual resource mix of the electricity you purchased.

2. New Renewables come from generation facilities that first began commercial operation within the past 15 years.

For comparison, the current average mix of resources supplying Southern California Edison (SCE) includes: Renewable (31.4%), Nuclear (9.2%), Natural Gas (22.3%), Hydroelectric (2.3%), Other (0.2%) and Unspecified sources of power (34.6%). This resource mix was prepared in accordance with the California Energy Commission Power Source Disclosure program.

The average home in California uses 542 kWh per month. Source: U.S. EIA, 2021
