Clean Power Alliance's Solar and Battery Access Program

Access to 100% renewable energy and lower electricity bills
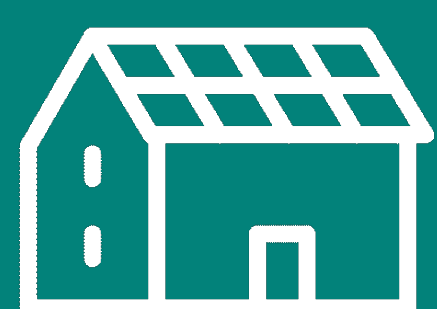

CPA's Solar and Battery Access program makes renewable energy accessible by helping qualified single-family homeowners in **Los Angeles** and **Ventura counties** have a solar and battery system that requires no initial payment for equipment and installation.

The program provides:

- A limited number of solar and battery systems for income-qualified single-family homeowners.
- Enhanced preparedness during power outages.
- An average reduction of 70% on electricity bill costs.
- Increased power grid stability.
- Professional operation and ownership from Haven Energy, so you can enjoy electricity bill savings without the hassle.
- The opportunity to purchase the system at fair market value after ten years, or have the system removed at no cost to you.

No Out-of-Pocket Expenses for Equipment and Installation for Homeowners

How does this work?

CPA's trusted partner, Haven Energy, facilitates the funding on your behalf, so you won't have to deal with the complexities.

+

Haven Energy will handle the paperwork, coordinate the funding and install the solar and battery system in residents' homes.

+

There are no credit checks, property liens, or out-of-pocket costs for equipment and installation.
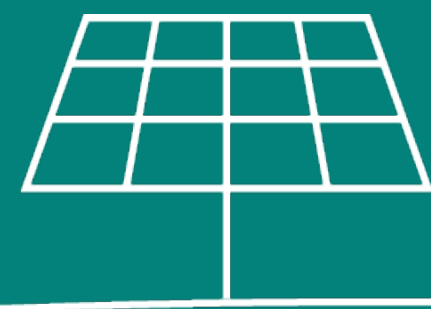

How long will this program be offered?

This is a first-come, first-served program. There are limited solar and battery systems available, so homeowners are encouraged to apply as soon as possible.

Benefits of CPA's Solar and Battery Access Program

Resilience and Energy Security:
Stay powered during outages with stored solar energy, ensuring reliability and peace of mind.
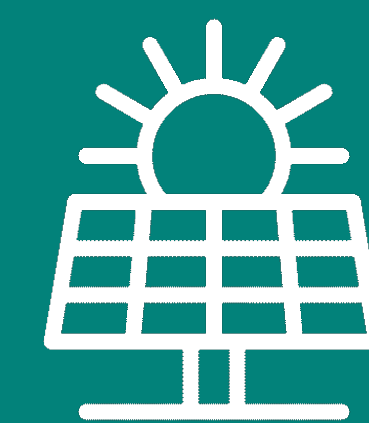

+

Energy Savings:
Start saving right away—customers see on average a 70% reduction on electricity bills as soon as the system is installed.

+

Smart Energy:
With a solar and battery storage system, you can create and store energy to ensure renewable energy – for homeowners and the power grid.
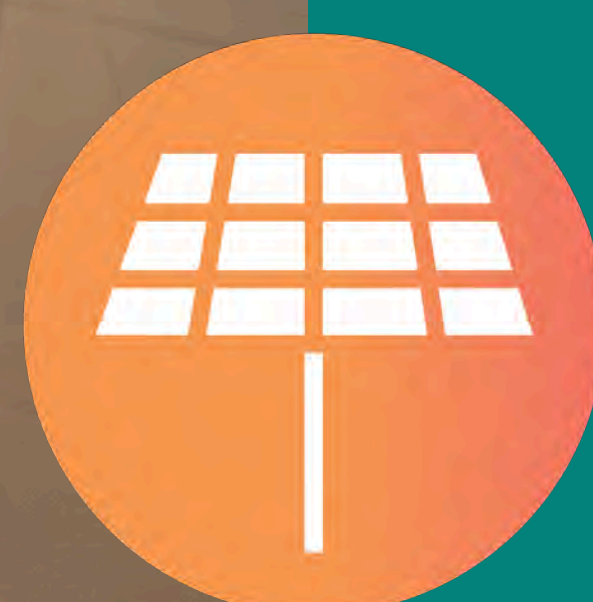

How long will it take?

Once you're approved for the program, Haven Energy will schedule a consultation, design your system, coordinate the necessary financing and permits, and manage the installation. Though these first steps can take between a few weeks and several months, installation at your home will be complete in 1-3 days. **Don't miss this opportunity – apply now to see if you qualify.**

About CPA and Haven Energy

Founded in 2017, Clean Power Alliance (CPA) is the fourth largest electricity provider in California. A community-driven organization dedicated to building a clean energy future, CPA provides communities and customers with sustainable energy choices such as solar and wind. To coordinate our Solar and Battery Access program, CPA has partnered with Haven Energy, a well-funded, venture-backed climate technology company dedicated to accelerating the clean energy transition.
