*A \$5/month participation incentive is issued for participants who complete at least five smart charging sessions per month for a total available incentive of \$60 per year.

**Actual annual electricity bill savings may vary. Savings are dependent on vehicle battery size, electricity rate, and customer usage.

CPA makes it easy to charge when electricity is less expensive, cleaner, and abundant.

Simply plug in your vehicle and our system automatically charges it during the most cost-effective hours to have it ready when you need it. Have a change of plans? Don't worry! You can always 'override' the system to charge whenever is best for you.

Visit cleanpoweralliance.org/evsmartcharge to learn more about the benefits of the EV SmartCharge program.

Reasons to Enroll Today

Save Money with Off-Peak Charging

With optimized home charging, we automatically charge your vehicle during the most cost-effective hours.

Unlock Incentives by Charging Smart

EV SmartCharge also helps you earn! Use the app to get financial incentives for charging off-peak.

Lower Your Carbon Impact

By joining, you reduce your carbon impact and help CA reach 100% zero-emission vehicle sales by 2035.

How to Enroll in the EV SmartCharge Program

STEP 1

Check Your Vehicle's Eligibility

See if your vehicle or EV home charger meets the eligibility requirements.***

STEP 2

Register Online

Create an ev.energy account where you'll be prompted to download our partner app.

STEP 3

Download the ev.energy App

Download the ev.energy app and sign in with the account you just created.

STEP 4

Add Your Vehicle and Charger Information

Add your vehicle, charger, and energy rate information to create a personalized EV home charging experience.

STEP 5

Tell Us Your Charging Times

Input your vehicle's 'ready time,' and we'll ensure your vehicle is ready when you need it.

STEP 6

Start Earning!

Input your Venmo or PayPal details to unlock incentives and earn money for completing five smart charging sessions each month.
