

ENERGY TEAM

 Our friendly experts are here to help

What is the Energy Team?

Clean Power Alliance's Energy Team are experts ready to help residential and small business customers with energy upgrades and fire hardening. We offer guidance on rebates and electrical upgrades like EV chargers and heat pump water heaters, and landscape management and building shell hardening to reduce fire risk - all at no charge. Our goal is to provide clear, unbiased information to help you save energy, lower costs, reduce your wildfire risk, and contribute to a cleaner, more sustainable future. Together, we can make the transition to cleaner energy smoother for everyone.

Services we offer

- ✓ Guidance on available rebates, incentives, and tax credits to maximize savings.
- ✓ Assistance finding qualified contractors and reviewing bids or proposals.
- ✓ Customized electrification and resiliency plans tailored to individual homes and businesses.
- ✓ Virtual energy assessments to identify energy efficiency and electrification opportunities.
- ✓ Technical support for customers already in the process of electrifying or fire hardening their properties.
- ✓ Virtual wildfire assessments to identify home fire hardening opportunities.

*The CPA Energy Team is available to serve residential and small business customers from 9:00 a.m. to 5:00 p.m. PT, Monday through Friday, excluding federal holidays.

⚡ Our friendly experts are here to help

How the Energy Team helps you

- **Expert, unbiased information:** As a not-for-profit organization, CPA offers a no-charge Energy Team service as a way to help its customers.
- **Cost savings:** Energy-efficient upgrades provide opportunities to lower energy bills, especially when paired with available rebates and incentives.
- **Environmental benefits:** Electrification reduces harmful greenhouse gas emissions and enhances indoor air quality, contributing to a healthier environment.
- **Lower fire risk:** Fire hardening can improve the resiliency of your home in a wildfire event.

Virtual Energy Assessment

Energy Team's Virtual Energy Assessment is a no-charge service where one of our advisors will guide you through the camera on your smartphone through an evaluation of your home or small business to identify electrification opportunities via a call. We'll also be looking for energy efficiency opportunities and determining your electrical panel's capacity for existing and future upgrades. After the assessment is completed, you'll receive a custom plan that can help you make decisions about the next steps to electrify your home or small business.

Similarly, Energy Team's Wildfire Assessment is a no-charge offering where one of our advisors guide you through an evaluation of your home to identify fire hardening opportunities, and provide a custom plan that can help you make decisions about the next steps to fire harden your home.

What you'll need for the assessment

To be at home or in your small business

A device with a camera connected to Wi-Fi (if possible)

Access to any relevant appliances you are interested in upgrading

Access to your electrical panel
