

**You and your community benefit from
being a part of Clean Power Alliance**

DID YOU KNOW?

By choosing clean energy, CPA customers collectively avoid more than three billion pounds of harmful greenhouse gas emissions each year, making our communities healthier. You can also benefit by participating in CPA programs that help save money on your electric bill.

Discover customer programs that are best for you using our interactive program finder. Get started at CleanPowerAlliance.org/programs

Clean Power Alliance (CPA) serves more than one million customer accounts with three main energy options. At the end of 2025: 708,827 CPA customers received 100% Green Power, 219,606 received Clean Power, 113,400 received Lean Power, and 9,707 received discounted 100% renewable energy through the Power Share program. The 2025 generation data below is provided in the annual report to the California Energy Commission’s Power Source Disclosure Program. This information is required by the California Energy Commission to be sent to all customers currently served by CPA.

Clean Power Alliance of Southern California - 2025 Power Content Label

Emissions, Power Sources, Unbundled RECs	100% Green (Retail Sales)	Clean (Retail Sales)	Lean (Retail Sales)	Power Share (Retail Sales)	CPA Total (Retail Sales, Other End Uses, & Losses)	CA Utility Average (Retail Sales, Other End Uses, & Losses)
Greenhouse Gas Emissions Intensity (lbs of CO ₂ e emitted per megawatt hour)	0	435	612	0	216	384
Renewables and Zero-Carbon Resources	100%	75%	45%	100%	83%	67%
Fossil Fuels	0%	25%	55%	0%	17%	33%
Biomass & Biogas	0%	1%	0%	0%	0%	2%
Geothermal	7%	6%	0%	0%	5%	5%
Eligible Hydroelectric	0%	4%	0%	0%	1%	1%
Solar	66%	3%	0%	100%	42%	25%
Wind	27%	12%	0%	0%	19%	14%
RPS Eligible Renewables - Subtotal	100%	27%	0%	100%	67%	46%
Large Hydroelectric	0%	46%	40%	0%	14%	10%
Nuclear	0%	0%	0%	0%	0%	10%
Emerging Technologies	0%	0%	0%	0%	0%	0%
Other	0%	0%	0%	0%	0%	0%
Natural Gas	0%	0%	0%	0%	0%	11%
Coal & Petroleum	0%	0%	0%	0%	0%	2%
Unspecified Power (92% fossil fuels)	0%	27%	60%	0%	18%	21%
Total	100%	100%	100%	100%	100%	100%
Retail sales covered by retired unbundled RECs	0%	0%	0%	0%	N/A	N/A

- This label does not reflect compliance with the Renewables Portfolio Standard (RPS), which measures the use of tracking instruments called Renewable Energy Credits (RECs) over the course of multi-year compliance periods. RECs that are purchased separately from the renewable energy ("Unbundled RECs") can be used for RPS compliance, but they do not factor into the power mixes or GHG emissions intensities above.
- GHG intensity figures exclude biogenic CO₂ and emissions from geothermal sources and grandfathered imports of firmed-and-shaped energy. For detailed information about all GHG emissions from California's retail electricity suppliers, visit the CEC webpage at the link below.
- Unspecified power is electricity purchased from a genericized pool on the open market. In 2025, 92% of unspecified power came from fossil fuels (natural gas, coal, and petroleum) and 8% came from renewables and zero-carbon resources (RPS-eligible and other renewables, large hydroelectric, and nuclear).
